

Station 2 - The Holy-Ghost-Church

The Holy-Ghost-Church, built in style of a basilica with campanile, was initiated in 1955, below the Bismarck tower, which has been built in 1900 and which is surrounded by interesting mansions.

In the middle of the church, two venerable wooden sculptures, which stem from the old St. Andreas church, should attract your special attention.

You can also see a Pieta from the 21st century, the figure of the holy Erasmus and modern sacred artworks in the interior of the Holy-Ghost-Church.
